

St. Joseph's General Hospital

Care with Compassion

MANAGER DIAGNOSTIC IMAGING

St. Joseph's General Hospital is located in the Comox Valley on beautiful Vancouver Island; one of Canada's best kept secrets. Enhancing our offer of a unique and progressive working environment is the desirable lifestyle afforded by Vancouver Island - with spectacular seascapes, breathtaking mountains and Canada's mildest year round climate. This dynamic Medical Imaging department is located in this fast growing community with all the modalities leading to a new state of the art regional hospital currently under discussion with Vancouver Island Health Authority. As a key partner in VIHA's island wide Medical Imaging program, this person will be responsible for leading the transition to a fully regional service in a new hospital in the next five years.

We are currently recruiting for this full time regular position; this position is available effective immediately. This position is responsible for the management of the Diagnostic Imaging Department by ensuring the provision of high quality patient care which encompasses the following responsibilities:

- Management of all imaging modalities providing service to patients and referring physicians
- Management of human, fiscal, capital, and other resources
- Development of a utilization management program in cooperation with the Medical Director of Diagnostic Imaging Management of the departmental occupational health and safety program
- Professional development of staff
- Implementation and maintenance of a Quality Management Program
- Strategic Planning for expansion of Diagnostic services as a part of the hospital wide strategic plan
- Fostering of interdisciplinary, collaborative relationships within the department(s), the division, the institution as a whole, the community and the Health Authority.
- Management of on-going technical improvements and changes to image acquisition systems including the Radiology Information System, and Picture Archiving Communication System.

To be considered for this vacancy graduation from an approved school of Medical Radiation Technology and registration with the Canadian Association of Medical Radiation Technologists is required. Completion of extension course in Hospital Departmental Management or equivalent; and a minimum five (5) years recent related experience in the field of health care administration including two years at a senior administrative level is required. Three years in an acute care hospital environment is preferred.

We would like to thank all candidates in advance for their interest and only those candidates selected for interview will be contacted. This position will remain open until successfully filled.
